Lower Electricity Rates For Adjoining Districts

Ratemakers of East Coleman and Blairmore Road, Grafton Town, and Willow Drive met in joint meeting Friday night to discuss progress in their efforts to have rates for electricity. An order from the Board of Utilities showed the decision reached by them, while correspondence from Coleman Collieries announced new rates effective as of July 4.

Prompt action has been given to the petition presented by the Board of Public Utilities by the ratemakers of East Coleman and Blairmore Road, Grafton Town and Willow Drive. The petition requested that the light and power rates for these sections of the improvement district correspond with the rates applied in areas surrounding them.

The Board has sent the ratemakers a copy of an order issued July 28 and explained in their correspondence that the request that lower rates be made applicable as of January 1 could not be met. The Board has no authority to make rates effective as of that date, but in the circumstances as outlined in the order the rates are applicable the day following the expiration of the notice which was sent the company. The Company has been advised that the Board will have no objection to any reduction that it might wish to make in the rates previous to the effective date of the order.

The notice sent the company stated that whereas the rates are higher than rates prevailing generally in the Crows Nest Pass and whereas the Calgary Power and East Kootenay Power both were prepared to offer service at the rates charged by Calgary Power in the Bellevue area, the Board caused to be served on Coleman Collieries on June 3, 1953, a notice to show cause within 30 days why the rates now in effect in Bellevue area should not be put into effect in the suburban areas, and the proprietor has now advised the board that it has no objection to the Bellevue rates being put into effect in its distribution system of East Coleman, Grafton Town and Willow Drive.

It is ordered that the rates set out in the schedule hereto shall be applicable to all meters read on and after the 4th day of July 1953, being the first day following the date on which the notice to show cause expired.

Schedule Referred to in Order No. 14781
of the Board of Public Utilities Com.
Dated 27th Day of July 1953.

DOMESTIC SERVICE: available only for lighting, heating, cooking, domestic power and ordinary uses in private houses and apartments used exclusively for residential purposes.

1st 20 KWHrs or less per month \$2.60 gross minimum.

Subject to 30c prompt payment discount making \$2.30 net.

All over 20 KWHrs used per mos. 1½ c net per KWHrs.

Discount of 30c applicable on all monthly bills paid within ten days of date rendered.

For rating rates apply where the maximum demand does not exceed 5 Kilowatts. Where the demand exceeds 5 kilowatts an additional monthly demand charge of 50c per kilowatt will be made. Connection charge for new consumers \$1.00, reconnection charge \$4.00.

COMMERCIAL SERVICE: available where other rates do not apply.

Service Charge: 1st 500 watts of installed capacity 30c per mos. Each additional 250 watts of installed capacity 10c per mos.

Energy Charge: 1st 50 KWHrs per mos. per k.w. of installation 10c per kwhr; Next 150 kwhrs per mos. per k.w. of installation 5c per kwhr; all over 200 kwhrs per mos. per k.w. of installation 2½ c per kwhr.

Discount of 10% if paid within ten days of date rendered based on the even dollars only of total bill with a minimum discount of 30c. Minimum charge of \$1.80 gross, \$1.50 net per mos. Minimum deposit, \$3.00. Reconnection charge \$3.00.

POWER SERVICE: (A.C.) available for motors, rectifiers, commercial heating appliances, etc. in commercial establishments.

Service charge: \$1.00 per mos. per kilowatt ampere (KVA) of installation (1 motor horsepower or 1 kilowatt in heating apparatus to be considered equal to 1 KVA).

Energy Charge: 1st 50 KWHrs. per mos. per KVA of installation 3 1/3 per Kwhr; next 100 Kwhrs per mos. per KVA of installation 3 1/3 per Kwhr; over 100 Kwhrs per mos. per KVA of installation 1 2/3 per Kwhr.

Discount of 10% if paid within ten days of date rendered based upon the even dollars only of total bill with a minimum discount of 30c. Minimum charge \$3.30 gross, \$3.00 net per mos. Minimum deposit \$2.00 per h.p. with a minimum of \$6.00. Reconnection charge \$6.00.

Federal Election Monday Aug. 10

Monday is election day, when residents are asked to cast their ballot for the candidate of their choice. Five candidates are in the race for this constituency:

W. C. Cooper, Nanton Rancher, P. Con,

Add Spice To Your Meals With Homemade Pickles

ALL vegetables for pickling must be fresh picked and not over 24 hours old. Dill, which is so popular a seasoning, is best when the seeds are full grown, but not so ripe that the seeds are falling from the stalks. It is extremely necessary that a good dairy salt be used for all types of pickling. Table salt should never be used. And vinegar should be of first grade for successful products. Brined pickles will spoil if not kept completely covered with the brine mixture. A good guide for quantity is one half the quantity of brine to pickle by measure; that is, $\frac{1}{2}$ gallon of brine will cover 1 gallon of pickles. To make brine add desired amount of salt to small quantity of measured water; bring to boil and add remainder of water. Allow to cool before pouring on pickle, unless otherwise specified in the recipe.

Chili Sauce

24 ripe tomatoes
4 green tomatoes
4 medium-sized onions
4 sweet red peppers
4 green peppers
3 teaspoons cinnamon
1 teaspoon ground cloves
 $\frac{1}{2}$ teaspoons ginger
1 teaspoon nutmeg
2 cups light brown sugar
 $\frac{1}{2}$ cups vinegar
2 tablespoons pickling salt

Scald tomatoes, remove skins, chop. Drain off surplus liquid. Cut green tomatoes in slices without peeling. Slice onions. Remove seeds and membranes from peppers, cut in narrow 2-inch strips.

Combine vegetables in kettle. Add vinegar, sugar and seasonings. Simmer gently until of proper consistency, about 2 hours.

Pack in sterilized jars. Run a knife down sides of jar to remove bubbles. Seal and store in cool, dark place. Makes about 3 pints.

*** * *****Celery Relish**

1 quart minced cucumbers
1 quart minced onions
1 quart minced cabbage
1 quart minced celery

Peel cucumbers before putting through the chopper. Mix all the chopped vegetables and sprinkle with half cup salt and let stand overnight. Then drain well. Prepare the following sauce:

4 cups white vinegar

6 cups sugar

$\frac{1}{2}$ cup flour

1 tablespoon mustard

1 tablespoon celery seed

1 teaspoon mustard seed

2 sweet red peppers, chopped

2 green peppers, chopped

Bring vinegar and sugar to the boil. Mix flour, mustard and mustard to a smooth paste with a little cold water. Pour the boiling vinegar over this and stir until smooth and well blended. Return to the heat

Patterns**Crochet of Straw**

7006

by Alice Brooks

Soave candy fruits, nuts in these shells! Use them on the table for crackers, bread mints! EASY—just crochet of straw, sugar starch into shape.

Pattern 7006 has easy-to-follow crochet instructions for shells, 6 and 9 inches.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Prairie Publishers Limited,
60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

TEN COMPLETE PATTERNS to sew, embroider, crochet—printed in the new 1939 Alice Brooks Needlecraft Book. Price 25¢. Many patterns to send for—including ideas for gifts, home accessories, toys, fashions! Send 25 cents now!

and cook, stirring constantly until thickened.

Add celery and mustard seed, well-drained vegetables and red and green peppers. Boil hard for 10 minutes, stirring to keep from sticking, and turn into hot, sterilized jars and seal.

*** * *****Corn Relish**

3 cups raw corn, cut from cob
3 cups chopped onions
 $\frac{1}{2}$ cup chopped green pepper
1 cup whole celery seed
2 tablespoons whole allspice
3 sticks cinnamon

Select small, garden-fresh cucumbers. Wash, cut into rounds and remove seeds, but do not peel. Place in stone crock. Make a brine of the salt and boiling water, pour over cucumber chunks immediately. Let stand 3 days.

Drain brine from cucumbers, bring to a boil and simmer for 30 minutes. Makes 4 to 5 pints. This is particularly nice with ham.

*** * *****Dixie Relish**

3 pounds green tomatoes
3 pounds red tomatoes
1 medium-sized head of cabbage
3 sweet red peppers
3 green peppers

1 quart onions
 $\frac{1}{2}$ cup whole celery seed
2 tablespoons salt

1/2 quarts vinegar
4 cups brown sugar
2 sticks piece cinnamon

1/2 teaspoons cloves

1/2 teaspoon dry mustard

Cut the vegetables very fine. Add salt, let stand overnight. Drain off the accumulated liquid.

Add vinegar and brown sugar. Place cinnamon, cloves and mustard in a cheesecloth bag, and boil all ingredients together for 30 minutes. Remove spice bag. Pour into hot water, let stand 30 minutes. Add onions and seal in sterilized jars.

*** * *****Old-Fashioned Mustard Pickle**

1 quart diced cucumber
3 apples, unpeeled and diced

1 large cauliflower, diced

1 quart diced onion

3 red peppers, cut in strips

3 green peppers, cut in strips

Combine all vegetables, place in crock with brine to cover (allowing 1 cup coarse salt to 1 gallon cold water). Allow to stand overnight. Drain thoroughly, add 1 cup water, heat to scalding point.

Measure out the dressing:

1/2 pound dry mustard

1/2 cup brown sugar

1/2 cup flour

2 teaspoons turmeric

1/2 teaspoon celery seed

6 cups white vinegar

Mix dry ingredients, add gradually to vinegar which has been brought to a scalding point. Cook over low heat, stirring constantly, until thick.

Pour mustard dressing over hot vegetables, again bring to boil over low heat. Boil 1 minute only, stirring constantly. Pour into hot sterilized jars and seal. Makes 8 to 9 pints.

Store.

Sweet Dill Pickles

Pack cucumbers in jars, cut any size desired. Pack plenty of dill in jars. Put 1 tablespoon salt to each quart of pieces of alum.

Make liquid of:

4 cups vinegar

2 cups sugar

Put 1 cup liquid in each quart. Fill jars with boiling water and seal tightly. (A little garlic may be added if preferred.)

Banff and Jasper Parks Cater To Tastes of Every Man

Both Jasper national park and Banff national park, set amidst regal splendor of the finest peaks in the Canadian Rockies, have all the facilities to cater to the tastes and sense of every man. Activities are now in full swing at these world renowned playgrounds. Accommodation and sightseeing facilities still offer the service and convenience praised in the many tongues of the international set as well as by Canadians.

Banff, the mile-high playground of North America, cradled by five mountains—Cascade, Sulphur, Rundle, Stoney Squaw and Inglismalde—is the headquarters of Banff national park, 2,585 square miles of mountains, glaciers, forests, streams and lakes.

The castle-like Banff Springs hotel is the centre of social life here. Its hospitality, attractive accommodation, cuisine and recreational facilities have made it world-famous.

The 6,704 yards of golf course were designed by Stanley Thompson of Toronto, internationally known golf architect, so that the maximum of scenic beauty doesn't escape the eye of golfers.

An outdoor swimming pool of warmed sulphur water overlooks the golf course and the beautiful Bow river valley. A warmed fresh water pool can be found indoors.

For those who prefer sightseeing, plastic topped buses and fine mountain roads will take the vacationer to many a scenic wonder. The more rugged holidayer can climb nearby peaks roped to expert guides or run the gamut of swimming, boating, riding, golf and tennis.

Not far from the town of Banff is the Stoney Indian reservation. And this year from July 20 to 23, as every year, the Stevens gather at Banff to hold their annual "Known as Indian Days". Banff's four-day festival fills the town with color as horses, squaws and papooses par-

ade in exquisitely worked traditional costumes.

Another annual event is the official riding and camping expedition of Trail Riders of the Canadian Rockies. This year the order will have its outings from July 14 to 18, July 21 to 25, and again from July 24 to 25.

North of Banff is Jasper national park, a 4,200-square-mile patchwork of ice-clad peaks, valleys, swift rivers and tranquil lakes and flying alpine meadows.

Heart of the park is Jasper and three miles away is Jasper Park Lodge. Both have the advantage of being situated in the widespread Athabasca valley. The mountains are all around but never crowd so close as to make the vacationer feel hemmed in.

The lodge, used for the winter, is a village of bungalows set in the shore of beautiful Lake Beauvert.

Here is where the holidayer finds the trail, back from the golf course or tennis court, to refresh himself with a dip in the open-air swimming pool, or enjoy a concert or dance, motion picture show, bridge, settle down with a book, or join in conversation.

Jasper offers every challenge the most expert alpinist can ask. Seventy per cent of the highest summits within the park or may be reached by Jasper as a base. Alpine club camps are held frequently in Jasper and independent climbers turn up every year.

Perch Way Ahead Of Trout In Spite Of Anglers' Viewpoint

While the meticulous angler knows the trout as one of the fairest of all creatures, and the yellow perch as mere vermin by comparison, fish scientists reverse the order, it was stated at the Quebec Biological Bureau, University of Montreal.

It should be added that this statement was made from the point of morphology, the science of form and shape. Differences between trout and perch in this respect are in favor of the latter, it appears.

In the light of science, no common fishes may be described as vertebrates and compared with man himself, the arms being represented in the fish by pectoral fins, the legs by the pelvic fins. In the more primitive posterior fins, there are more or less present. But in higher fishes, such as the perch, the "legs" have moved forward and are fashioned to what in humans could be called the shoulder. grotesque as this may appear, it is considered to be a change to a lower to a higher form.

The perch's spines, too, which to the angler are the source of many a nasty gash, are considered a special advantage, enabling an advance over the half-trained trout.

Generically, fish scientists call

Maye It Pays To Be Helpless

It was Marie Corrill who said, "In absence of love, a woman is perhaps most easily ensnared by a man who can combine passion with plausibility and hot pursuit with social tact and diplomacy." Women are clever, perhaps slightly more so than men, but why is it that practically no female can properly sharpen a pencil, read a racing form or a timetable, or properly park an automobile?

Unnecessary Speed

What is the advantage of having an automobile that can go from 80 to 90 miles an hour? Where on this continent can you go over 60 miles an hour and not break the law? Even on the New Jersey turnpike the speed limit is 60 miles an hour. Then \$100 is the price for each mile over the speed limit is exceeded, plus court costs of \$4.50. So spending over 80 miles an hour calls for a fine of \$20, plus court costs. Seems to me the automobile manufacturers should go in for stronger bodies on cars and place less emphasis on speed.

Feminine Doubtletalk

How many languages do you speak or understand? Do you understand the female language? If so, what is the translation of the following from an account of a wedding? "The bride has selected a wedding gown of blushing-pink mouseline de soie over satin, appliqued with lace, and featuring a chapel-length train. Her full illusion veil will be held in place by a matching cloche."

What Next, Gentlemen?

For the past year the claim has been that the female is the superior sex but been constantly commented upon by innumerable feminine writers. On several occasions I reported to our male clientele that I viewed this situation with alarm. That I feared it was being taken too seriously. How right I was, gentlemen! One manufacturing firm recently replaced all its male executives with females. Reason given for this move was that "women have more sense than men."

Scandinavian Distinctions

Subscriber named Johnson says she is a Norwegian. She says it can be determined whether a person is a Swede, Norwegian or Dane by way the ending of names is spelled. If it is "sen" the person is Norwegian or Danish, as in "Olafsen", "Anderssen". If ending is "sen" as in "Olsen", "Johnsen", the person is Swedish. Very interesting. But how about Carl Brisson, the debonair Dane, who was born in Copenhagen? Should his name be spelled "Brisson"?

With Temps to Match

When it comes to red-haired beauties, it is difficult to top the Scotch lassies. There are more red-haired women in Scotland than in any other country in Europe. This brings to mind that the last time I was in Victoria, British Columbia, I dined at a hotel managed by a Scot. All the waitresses at this hotel were red-haired. Natural redheads, too.

A Clear Case of Gluttony

Nobody has a greater admiration for the intelligence of dogs than I. Yet I must admit when it comes to eating, few dogs display much sense. As for example, take a Great Dane pup named Scheherazade. This pup weighs five pounds. Recently she stole a six-pound ham and ate five pounds of it! So this canine glutton was swollen up to twice its size and for a period was a very sick dog.

Good Care Can Preserve Your Leather Belts

By ELEANOR ROSS

Hints and suggestions, starting with some idea on what becomes a major accessory item, the belt. In fact, many of us are becoming belt collectors just as we collect scarves, gloves and costume jewelry.

Those sensitive leather belts, now so popular, should be given the same good care as other leather items, since polishing adds to their lustre. They are not as durable as leather. And those handsome belt buckles should receive good care, too, as should any other metal ornamentation. To do this give the metal parts an even coating with a thin layer of colorless nail polish and then they'll be a hilt of tarnish or a scratch.

Belts made of the same material as the garment should be given the same care as suggested by the manufacturer for the garment itself. When a belt is not in use, don't let it remain on garments, as it may damage them.

Letting it remain in the garment belt loops isn't good for the garment or the belt. If hanging it is not convenient, roll the belt so that it doesn't crease or bend—never fold.

Moving into the kitchen, we would like to suggest that the can opener, often a housewife's best friend, get good care. It should be kept spotlessly clean, but is only too often overlooked.

Moving into the kitchen, we would like to suggest that the can opener, often a housewife's best friend, get good care. It should be kept spotlessly clean, but is only too often overlooked.

Wash with soap and hot water after each use. Food left on the blade may spoil, contaminating food as other canners are open. For this reason when you purchase a can opener, use a soap brush on the cutting edge. And every now and then treat this type to a quick soak—without soaking. Oil the mechanism at intervals.

And don't let the idea of some experts about not washing the bowl alarm you. Contrary to all such talk, a soapy bowl can be washed without any harm, just don't immerse or soak in water, but just wash suds and a cloth for painted or lacquered bowls, and a soapy brush for unpainted ones, then rinse and dry.

In brightening up the home don't overlook cleaning that best and most inexpensive of all house brightness—the house plant. Soot and dust should be washed off house plants to permit the leaves to "breathe" and so forth.

Protect earth in the pot with a piece of round plastic or waxed paper.

PISCILLA'S POP—The Bookie-Worm

How Long Will Food Keep?

"How long will foods keep good quality in a refrigerator?" is a question homemakers often ask food specialists of the department of agriculture. There can be no fixed answer, because the keeping quality of a perishable depends on its condition and also on the temperature and humidity of the refrigerator. However, if the homemaker does her part, wrapping foods correctly and keeping them at the right temperature, the specialists say it is possible to predict roughly a food's probable storage life.

In an automatic refrigerator with the control set for normal operation, food will probably stay between 38 degrees F. and 42 degrees F. The average just below freezing is much safer, for storage of foods such as meats, poultry and fish, needing the lower temperatures. The bottom of the cabinet is somewhat warmer than the center for less perishable foods. If in doubt about your refrigerator, take the temperature in different locations with a thermometer.

In the home refrigerator, little control of humidity is practical, though some, especially the cold wall types, maintain a more moist atmosphere than others. Any refrigerated food that tends to become unpalatable through drying or shriveling should be kept covered to retard evaporation.

To help homemakers store perishables, the food technologists have outlined the following table, showing storage conditions needed, and how long food is likely to hold good quality if quite fresh when refrigerated.

Milk—Keep below 45 degrees F. Use within three days for best quality.

Eggs—Keep at 42 degrees F. Use within seven days for best quality. Probable storage life, two to six weeks.

Hard cheese—Keep tightly wrapped in closed container. Surface mold may be trimmed off. May keep for months.

Soft cheese—Keep in closed container in coldest part of refrigerator. Will keep approximately one to two weeks.

Fresh meat: fresh meat cuts, ground beef, liver, variety meats—Store loosely wrapped at 38 degrees F. Storage time for pork cuts somewhat shorter than for other meat cuts. Use ground meat in one day. Varieties in meat—old or fresh—meat cuts in three to six days.

Cold cuts, sliced—Wrap in semi-moist paper material such as waxed paper, and store at 38 degrees F. Use within six days for best quality.

Bacon, sliced—Store at 38 degrees

Cut Out Hazards At Home

You sit around reading the evening paper, shaking your head in dismay over the auto accident or plane crash that's holding the headlines. You're in your own living room, safe at home—or so you suppose. But, warns the National Safety Council, a house has hazards too.

Statistics show this statement to be alarmingly correct. Each year thousands are killed and millions are injured in home accidents. So if you'd rather be safe than sorry, you'll be interested in the words of warning the council offers in "When You Build or Remodel", a booklet of safety suggestions for home owners.

The opening article offers advice on choosing a site. "There are recommendations on extending porches. For example, be sure the driveway is so angled that bushes and shrubs don't obscure the entrance and exit. Plan any entrances to the house with handrails, because steps get slippery in icy weather, and a rail may save some member of the family from taking a bad fall. Handrails are important indoors, too, on any staircase that has more than two steps."

A further compilation stems from the fact that the size of crystals in unprocessed honey varies considerably. Obviously, the amount of heat required to melt a crystal is directly related to its size.

In experiments at the Bee Division, Queen's Experimental Farm, Ottawa, samples were taken from a silicate honey containing coarse crystals and from another lot of the same honey containing fine crystals. For the various treatments the samples were heated rapidly to a pre-determined temperature. Some were removed as soon as the crystals were reduced to sub-visible size while others were held at that temperature for successive periods.

Examinations of the stored samples indicate, reports G. H. Austin, that at each temperature tested a certain minimum holding time is necessary for all crystal nuclei to be destroyed. With the coarse-grained honey tested, the relationship appears to be as follows: 160 deg. F.—25 minutes; 170 deg. F.—10 minutes; 180 deg. F.—5 minutes; 190 deg. F.—2 minutes.

There has been no evidence of re-growth of crystals in any of these samples after four months' storage.

It should be emphasized that in the above treatments the honey had been in the indicated temperature in a matter of seconds and after being held for the indicated interval, was cooled just as rapidly back to room temperature.

Back him into a corner and straddle his neck—

Don't damage your teeth, you must grit;

If you can't hold your temper, you might as well quit!

For wise old Dame Nature whose methods don't fail,

Never mean for a calf to drink out of a pony's pail;

Hang on to your patience, you teeth you must grit;

If you can't hold your temper, you might as well quit!

Just give him a finger . . . and maybe with luck,

That little calf will start in to suck!

Pickup your bucket and push his head down—

Away you both go again, round and around! . . .

Do this for a week — with your little kink.

And maybe by then you will teach him to drink . . . —Ex

New Zealanders eat more pounds of butter a year on the average than do people of any other country.

Weekly Tip

BURNT SPOTS

To remove burnt spots on grandiose cover the spots with a teaspoonful of soda and a little water and heat it. Never scrape with a knife.

Drive With Care!

Local Woman's Aunt Dresses Doll In Coronation Costumes

The following account is reprinted from the Winnipeg Tribune and is of local interest due to the fact that Miss Hestad is the aunt of Mrs. Harry Bowman of Coleman.

You don't need to go to Dickens-Winnipeg has a doll's dressmaker, a dear little person, almost a doll herself. Agnes Hestad, 4 Minto Hall, Carlton St., has a family of dolls she has dressed for her own amusement, crowned by the queen of the collection, a regal doll in coronation robes.

So, meet Jenny Wren, who might have stepped out of Our Mutual Friend to show her dolls. But they're not for sale.

Making the imperial state crown was her final work of art; she watched the replicas in a local store, studied colored magazine pictures, then used her ingenuity. Crimson velvet and ermine she could buy but how to get stones and metal for the superstructure? Slim silver bracelets set with rhinestones were the answer, curving up in three half circles to a mount "which should be a diamond, but I made it out of square cut stones—I was lucky in finding a broach that had eight square cuts."

"I couldn't make the St. Edward's Crown—the five-pound crown the Queen will wear for only five minutes—because I couldn't get anything for the gold knobs."

Each jewel on the gold-stick sceptre was glued into place with airplane cement. Tweezers turned out to be less satisfactory than her own fingers, says Miss Hestad.

The white brocade silk dress has an all-over design down the front and at the hem in gold embroidery. "I took a course to learn how to apply metallic thread," was the quick reply. The

long purple velvet robe has a gold thread design too, also done on the machine, showing the rose, thistle, shamrock, daffodil and maple leaf for Canada.

The doll's dressmaker sews for a living—makes uniforms in a factory. "We specialize in the nurses' white uniforms for the General Hospital, like this." Then in a glass case was a doll dressed as a miniature Winnipeg General hospital nurse. "My specialty is the pin tucks in the front of the bodice and the inset pocket."

The bride's doll with a china face was Agnes' first doll as a child. She's sweet, but old fashioned compared with the plastic dolls.

When the reporter called to ask if she could see the Queen doll, little Jenny Wren said with a smile, "of course, only—she has her hair in curl pins!" There they were, inch long, special doll bobby pins, just a quick redo for the front brown shining hair. The doll has deep blue eyes, "and a regal look."

She will be displayed at the True Blues Coronation tea in the T. Eaton assembly hall, April 11.

Jenny Wren in Charles Dickens' Our Mutual Friend made doll clothes to earn a living. That wasn't her real name, either, but she liked it. She visited fashion displays to learn the latest fashions for her dolls. She was not so lucky as our Jenny Wren, she walked with a crutch. Our Jenny had polio as a child in Saskatchewan.

FOREST PRODUCTS LEAD

Forest products produce four times as many export dollars as iron and steel and all their products, including motor cars, locomotives, and farm machinery.

Photofilm is made from wood pulp.

Cadets Attend Vernon Camp

Coleman members of the local Cadet Corps are attending the summer camp at Vernon, B.C. under instructor Lieut. R. Lowe. Taking advantage of this opportunity of gaining added experience and service to their country are: Cadet Lieut K. Fosier, S/Sgt. J. Kapakla, Sgt. D. Gentile, Cpl. R. Lowe, Cpl. E. Vincent, L/Cpl. A. Prowski, L/Cpl. D. Hammer.

The organization and provisions that are necessary for a camp of this type and the manner in which the boys are being looked after can be seen in the following news item that appeared in the Vernon paper.

With 1200 cadets and staff members to feed for a seven-week period, the Army has better than 175,000 individual meals to prepare. Quantities must be enough to satisfy teen-agers' outdoor appetites, and quality sufficient to maintain muscle and stamina for a steady round of rigorous training.

To serve cadets aged between 14 and 18 from more than 90 different cadet corps in B.C. and Alberta, Royal Canadian Army Service Corps caterers list the following items among the foods for consumption during the camp: 100,000 grade "A" large eggs, 3000 pounds of bacon, 30 tons of potatoes, one ton of jam, 20 tons of meat, 12 tons of bread or 24,000 loaves, one ton of oatmeal, four tons of butter, 1600

pounds of cheese, 2000 lbs. of lard and shortening, 1500 gallons of fruit juice, 50,000 quarts of milk, and two tons of canned tomatoes.

Food is supplied on a contract basis, the majority coming from Okanagan Valley distributors. Daily cost per cadet is slightly less than one dollar.

In addition to direct supply of staple items, the Army also makes an allowance of 8c a day for every cadet for the purchase of "extra messings." This money is utilized to buy such items as sausages, spices, ice cream, mustard, etc.

Preparation and serving of the food is a mammoth undertaking in itself. A staff of more than 80 cooks and messmen, including 14 women, is needed for this chore.

...V-

Forest Facts

The forests generate a quarter of the income of all Canadians.

Better methods of forest management have come from research.

Aerial photographs show the wood content of a forest.

B.C. forests are practically entirely composed of conifers.

A balansa forest could reach merchantable size in 40 years.

Normally it takes at least sixty years to grow a spruce forest.

As with farm crops, the period of tree growth varies greatly.

Canadian pulp makes cellophane, explosives, film and plastics.

Pulp and paper is Canada's leading enterprise and exporter.

The forests provide a third of all Canada's primary production.

Pulp and paper generates an eighth of the national income.

Sixty per cent of the original forest of Canada has been burnt only 13 per cent has been cut.

Before You Vote...

THINK IT OVER

After the Election is over, the West will again be forgotten by the old line parties.

It is possible this time that a strong representation of C.C.F. members from the West could hold the BALANCE OF POWER and so secure favourable legislation for the West.

The West needs your vote; so vote X for

Mr. Lewis Jones is a patient in St. Michael's hospital at Lethbridge.

Miss Gloria Ryznar is visiting her parents.

Mrs. Ding Bell has returned home having been a patient in St. Michael's hospital.

Brick Bell was a recent Calgary visitor.

Mr. and Mrs. Hughie Pike former residents, visited Mr. and Mrs. Bert Young.

The Journal will be closed for holidays the next two weeks. Our next paper will be on Aug. 26.

Mrs. Margaret Antel has left for a vacation with her sister at Seattle.

Mr. and Mrs. Jim Miki and Mrs. Shirley Ondrik have taken up residence in Pincher Creek.

Mr. Stanley Halluk is attending the Red Deer Composite High School.

Helen and Linda Shufleeta of Cranbrook are visiting their aunt Mrs. G. Dunford.

Mr. and Mrs. Charles MacQuarrie motored to Drumheller. They were accompanied on the return trip by their daughter Della who has been matron at the hospital there for the past year.

Mr. Wm. Raymond and son of Vancouver are visiting relatives here.

Mrs. Dominic Hart and two children are spending the summer with relatives at Hinton.

Mr. and Mrs. W. Filewisch and family, accompanied by Joseph Polski, spent a holiday at Radium.

C. Freeman, E. Somshor, R. Spillers, C. Pilfold and T. Vejprava attended the Rotary Ball Tournament at Lethbridge last Friday.

Mr. and Mrs. H. Bowman, Mr. and Mrs. T. Bowman and Leonard McCoy motored to Estevan and Lake Alma, Sask. last week.

Mrs. E. Gare, of Penticton, is visiting with Mr. and Mrs. T. Flynn. Mrs. Gare was a former resident of Coleman, her husband having owned the Coleman Journal at one time.

Mrs. R. Pattinson and daughter Georgianne have returned after spending a holiday at Fort Macleod, visiting Mrs. Pattinson's parents Mr. and Mrs. H. T. Halliwell.

We regret that our informant erred in the report that the Coleman Volunteer Fire brigade had asked for an increase in pay. Chief Montalbetti reports that no request was made.

Mr. and Mrs. W. T. Beck returned last week from a two week motor trip over the Old Princeton highway to Vancouver from there down the Oregon coast where they spent several days in Seaside, Canyon Beach and Ocean Side.

25,000 years ago the cave men advertised their prowess as hunters. Their signs, paintings and carvings on rock, remain today. Advertising is a long range policy. Just because you cannot see the results the day following the advertisement does not say that it is not useful.

Lt. Col. J. F. Merritt of the Salvation Army, the Divisional Commander for the Alberta Division was an unexpected visitor to Coleman on Sunday July 26th. His purpose in coming was to welcome the new officers Lieut. & Mrs. G. C. King to the Division. He participated in the evening service.

Local Alpinists Climb The Crow

When a merchant asks the newspaper to show him the money that advertising has placed in his till it is like asking a farmer to show you how much hay the sun has placed in the hayloft. The sun cannot directly put in your hay but without you wouldn't have a hayloft.

Mr. and Mrs. Geo. Rushton and family were visitors at the home of Mr. and Mrs. Jack Rushton, of Trail. On their return home they were accompanied by Jack Rushton sr., who had spent three weeks holidays with his son.

Mr. and Mrs. D. W. Jessey and son Bob, and Mr. and Mrs. Mel Brown, all of Calgary, travelled to Coleman via the Kananaskis highway, visiting first with Mr. Bob Jenkins and party who are holidaying at Twin Cities, then continuing on to town to spend a few days the guests of Mr. and Mrs. Geo. Jenkins. Mr. Bob Jessey will spend extra days here the guest of his cousins, George Jenkins Jr.

BELIEVE IT OR NOT

Yes, believe it or not, fish in the Elk Valley come complete with cash bonuses.

Steve Bacovsky of East Cole man was fishing in the Elk on Tuesday and brought in a bull trout measuring 16 inches. Cutting it open he found three \$1 bills and one \$2 bill.

CARD OF THANKS

I wish to express my thanks to all those who attended the shower in my honor and contributed the lovely gifts. A special thanks to the hostesses.

Mrs. T. Geijos

The aim of forest management is to harvest trees and maintain the yield on a perpetual basis.

Mrs. T. Geijos

Records of earlier climbs and a clear view of the surrounding area were found by a party that scaled Crows Nest Mountain Sunday for the first recorded climb since 1930. Comprising the party were Peter Allen, Don Norris, C. McCullagh and Fred Walker.

The party left Coleman early Sunday morning, leaving their jeep at 8:30 a.m. to start the climb. By 9 a.m. they had crossed the Belly River shale beds then climbed the Talus Shales to the Exshaw shale cropping at approximately 7410 feet. By 11:30 they had reached the chimney and encountered ice conditions so heavy that they were forced to use ropes and alpine staffs to go up the chimney to the top. The top was reached by 1:10 after a hard and dangerous climb.

The climbers found clear skies at the top with a slight breeze, whereas surrounding mountains were covered with haze. Chief Mountain in Montana and the water tower at Medicine Hat were visible.

More dramatic was watching a forest fire at the headwaters of the Alexander Creek. Also noticed through the glasses were the cairns erected on some of the Seven Sisters by Bruno Engler and Fritz Fry.

Some of the old records on the top are now destroyed as the metal containers are badly smashed. Through these records it was noticed that the last recorded climbs were by Bruno Engler and another by Peter Allen and Russell Montalbetti, both in 1950. From these records it was apparent that the last climb was made in August and September, possibly accounting for the fact that this year's party encountered ice and a similar attempt in June of last year encountered ice so heavy they were forced back.

Climbs have been made by people from New York, Alaska, Australia, England and all parts of Canada, the majority of them in the early 1940's. The first recorded climb of this mountain was by a Dominion Survey group in 1887 although no record can be seen at the top. The flag poles carried to the top by the climbers some years ago are still in evidence and color pictures were taken of the poles as well as the surrounding country.

KOSTELNIK — SUTHERLAND

The marriage of Mary Edna Sutherland and Allan Joseph Kostelnik was solemnized at a wedding ceremony performed by Rev. E. J. J. Hoag of St. Anne's Anglican church, Winnipeg at 4 p.m., July 11. The bride is the youngest daughter of Mr. and Mrs. William Sutherland of West Kildonan and the bridegroom is the only son of Mr. and Mrs. Joseph Kostelnik of Coleman, Alberta.

The church was beautifully decorated with assorted fresh flowers. The organist was Miss Betty Anne Wright. During the signing of the register Mr. Jack Carey rendered "O Perfect Love". The bride given in marriage by her father was lovely in a white nylon tulle, over taffeta gown worn over a crinoline. The strapless bodice was topped with a jacket of Chantilly lace featuring a stand-up collar and lily point sleeves. Her circular finger-tip veil fell from a tiara of lace and pearls and was nylon tulle to match the gown. She carried cascading white daisies and stephanotis.

The maid of honor Miss Alice Lange was gowned in a blue dress similar to the one worn by the bride, her bouquet was pink daisies and her headress was blue nylon tulle chapel veil.

Mr. Lee Girard supported the groom, and ushering the guests were Mr. A. Smith and Mr. W. Sutherland only brother of the bride.

A reception was held later for one hundred guests in the West Kildonan Legion hall.

The bride and groom left on a wedding trip to Coleman, Alta., to visit the groom's parents and on their return will make their home in Winnipeg where the groom is stationed with the R.C.A.F.

POPULAR PASS COUPLE
MARRIED IN BLAIRMORE

In a ceremony at St. Anne Rectory, Blaирmore, at 10:30 a.m. on July 25, Frances Bernice, eldest daughter of Mr. and Mrs. A. Mark of Blaирmore, became the bride of Alexander Henry, son of Mr. and Mrs. J. Kovack of Coleman. The marriage was performed by Rev. Father A. Anderson.

The bride, given in marriage by her father, was lovely in a floor length white net over satin dress with lace bodice and a nylon yoke. Her illusion net finger tip veil was bordered in heart shape seed pearls. She carried a crescent shape bouquet of lilies and roses. Her jewelry was a string of pearls, gift of the groom.

The bridesmaid, Miss Beryl Mark, sister of the bride was gowned in a floor length yellow net over silk dress complemented by a yellow lace bolero and carried a nosegay of pink carnations.

For the wedding, the bride's mother wore a pale green dress with white accessories. The groom's mother chose a navy dress with white accessories.

The usher was John Kovack. Miss Shirley Morgan played the wedding music during the signing of the register.

A reception was held for about 50 people at the home of the bride's parents, Mr. and Mrs. A. Mark.

Rev. Father Anderson proposed the toast to the bride which was replied to by the groom.

For her wedding trip to Spokane and Couer d'Alene, the bride wore a pink two-piece suit with white accessories.

On their return the young couple will make their home in Calgary.

A large number of friends attended a shower in the I.O.O.F. Hall last Tuesday evening, honoring Miss Alice Lybacki, whose wedding took place on Saturday July 25.

On arriving at the hall with her mother, the guest of honor

was presented with a corsage, which was pinned to her shoulder by Mrs. M. Wolstenholme.

Whilst and bingo were enjoyed during the evening, with prizes going to Mrs. A. G. O'Neill of Blaирmore, Mrs. Mike Trachuk sr. and Mrs. H. Newton. The novelty prize was won by Helen Kovach.

The hostesses served a very nice lunch. Miss Lybacki was the recipient of a chrome kitchen suite, gifts of china, linens and silver and a hostess gift of a table and lamp. Miss Dora Dunlop made the presentation address, expressing the good wishes of those present, and those who sent gifts.

Miss Lybacki suitably replied extending her thanks to all.

...V...

About 50 ladies gathered at the I.O.O.F. Hall Wed. July 29 to a shower in honor of Mrs. Tony Gejdos.

During the evening Whist and Bingo were played with prizes won by Mrs. J. Lapacek Mrs. Ann Vasek and Mrs. A. Kubica. The door prize was won by A. Soroff

Through money collected, the honored guest was presented with a cedar chest, iron towels, and pillowcases. The hostesses gifts were: comforter, sheets and pillows. Many other gifts were received.

Road Work Continues At Lundbrek Site

Another attempt is being made by the government to prevent the road about one-quarter mile east of the Lundbrek Falls bridge from sliding in a south-easterly direction. The No. 3 highway at this point has been the cause of great concern to road crews, who for the past two years have been attempting to hold the road in position but have constantly failed due to underground springs washing through the clay about 40 feet below the

surface and causing the road to slide. Last summer the CPR railway tracks immediately north of the highway at this point began to slide and pilings were driven into the earth to protect the tracks.

At present a process of electroosmosis caused by a direct current is being tried in an attempt to halt the sliding highway. This method changes the orientation of the clay particles and increases the shearing strength of the soil. This is done by drilling 16-inch holes into the ground until blue clay is struck, at which time screen anodes and cathodes are placed into the holes and wire is attached to an electrical generating plant which shoots the current into the ground, changing the orientation of the clay particles.

The stretch of road under process is about 150 feet long and 200 feet wide and holes will be drilled at various spots in this area and the new method will be given a fair opportunity to prove its worth.

Some of the holes dug by rat-hole drills are 16 inches in diameter and vary in depth from 20 to 40 feet. So far two of the holes have been dug and wired and a small gasoline DC generator is being used to shoot the current into the ground. When more holes have been dug and wired a large generator will be brought to the site.

...V...

DIESELS ON MOUNTAIN RUNS

VANCOUVER — (CP) — Canadian Pacific Railway's oil-burning steam locomotives in B.C.'s mountain will be almost gone by early fall.

The steam engines will be replaced by 80 diesel-electric locomotives on the railway's passenger run from Medicine Hat, Alta., to Vancouver and on freight runs from Crow's Nest B.C. to Vancouver.

In announcing the changeover Tuesday night, CPR officials said the old engines will be reassigned

to the Prairies and eastern Canada.

COAL-POWERED ENGINE MAY REPLACE PRESENT DIESEL

Progress in developing a coal-powered engine which some day may replace the diesel was described by Mines Minister Prudham.

Mr. Prudham said the machine "shows great promise." Be-

ing developed by federal government & McGill University technicians, it is a coal-fire gas turbine type.

The engine may find a practical application in the railway industry, said Mr. Prudham. Researchers expected to have an experimental model in operation within a few weeks.

The pulp and paper industry is making an increasingly more economic use of its wood resources.

"I'd like to say this
to all Canadians..."

UNDER a Liberal government, Canadians have added every year to the national strength and national unity of Canada;

We have had the greatest expansion of social welfare in our history;

We have increased our employment, our production and our national income every year;

We have had the greatest expansion of our primary and secondary industries — truly an industrial revolution;

Because of the outstanding contribution of the members of our Navy, Army and Air Force, we have been able to put our full share to prevent and to stop Communist aggression;

We have reduced the national debt every year, and, in the last two years, reaped the reward in lower tax rates.

Do we want all that to be continued?

Do you really think it's time for a change?

For a change to a Parliament of regional groups — a handful of Social Creditors from the Far West, a few Morel Conservatives from Ontario or the Maritimes and some so-called Independents from Quebec?

In such a Parliament without the leadership and responsibility of a united national party, how could the government help being weak and insecure?

Do we want a weak and divided government to deal with the formidable problems of the next few years? I ask you, IS it really time for a change?

We believe most Canadians want a government which encourages enterprise, promotes trade and fosters the exploration and development of our resources; and you know it as well as we do, that requires balanced budgets, paying off debts in prosperous times and a tax structure which, while fair to all, is adequate to meet these demands.

U.S. Starfire Jets Streak To Home Base

World News In Pictures

Baby Lama Likes The Limelight

NEW WING FOR HOTEL — Stanley Glickman of New York City's ASPCA isn't seeing quite eye-to-eye with that black and yellow finch, but then again, he wasn't the only one having that trouble. The little bird flew into the Algonquin Hotel and gave guests, employees and the ASPCA a merry chase before Glickman managed to catch it—without putting salt on its tail.

SCHOOL IS A CIRCUS—Students at Florida State University, Tallahassee, Fla., have the opportunity to enroll in a circus course. Patricia Payne and George Bowers are seen passing a test in high-wire antics under the big top.

GLEAMING GUARDIANS—A flight of U.S. Air Force F-94 Starfire jets gleam in close formation as it streaks to its home base in Japan. Employing performers like these, the Japan Air Defense Force maintains a constant vigil, safeguarding the country from possible attack.

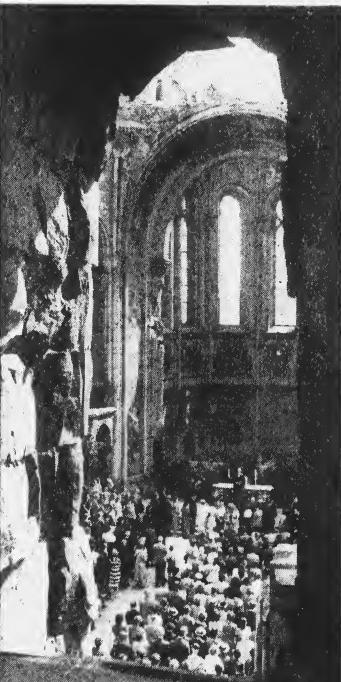

ONE WAY TO DO IT—The heat wave in Paris has caused the residents to do something about the weather. This pretty model couldn't wait for the swimming pool to fill up, so she just stood under that big water pipe. Her expression indicates that it felt just fine, too, even if there wasn't enough water in the pool at the time to do any swimming.

WEEKLY CROSSWORD PUZZLE

TASSEL, a Dalmatian belonging to trainer Harry Fownall of the Arden Homestead Stables at Orlando, Fla., gets the straight dope. His informant, Siam, is one of Fownall's trainees. Siam is not a race horse but perhaps show horses have secrets too! 3047

THE FAITH GOES ON—The lowering ruins of the Kaiser Wilhelm Memorial Church form a picturesquely setting in Berlin for the services commemorating the descent of the Holy Spirit on the Day of the Pentecost (Whitsunide). The church, almost always crowded to capacity, has neither roof nor pews to accommodate the faithful who attend services regularly in the building that was ruined by bombs in World War II.

SIGNED UP—Hollywood screen stars Lana Turner, (left), and Pier Angeli sit together as they talk with newsmen in a hotel in Rome. Pier is an Italian girl who became a U.S. film star and this press conference followed the announcement that she would co-star with Lana in a picture to be made in Europe.

OUR COMPLETE SHORT STORY—

Spikes In the Dust

The Ball Crashed Into O'Toole's Temple and Spikes Glistened In the Sun.

By VINCENT LUNNY

JERRY BELL gobbled up a bad-hopping grounder, and tossed the ball to second base for a force play, ending an inning in the Hawks' practice game.

"That's the old pepper!" shouted Phil Weston, second baseman. "You'll be in the lineup regularly with me yet." The struggling shortstop didn't answer, but his jaw jutted out. A raw-boned kid with swivel hips and an arm like a whip, Jerry had ridden into the league on tons of printers' ink.

But the ballyhoo was not for Bell alone. Joint beneficiary of the praise was the kid at second base who had compiled the play. Bell and Weston had played together in the minors, nurtured as carefully as hothouse plants for their big league debut. The experts rated them the best少年 combination to come into the majors in years.

Weston made the team easily, the Hawks had not started Bell yet in a league contest. A wild Irishman named Pat O'Toole clung to the shortstop position and hit 26 homers last season and stole 30 bases — so why not the Hawks to do?

"Still trying, eh, kid?" said Pat O'Toole as Bell came into the dugout. "Yeah, you're darn tootin', and I'll be in there every day yet," Bell replied, his voice rasping like spikes on a cement floor.

"Says who? Think you're pretty good, eh?"

"Weston and I've been playing in the Hawk chain for four years," Bell said with malice. "And we'll be playin' here when you're outta the league."

"Why, you fresh punk . . ." Staying the next inning of the half-inning game, the Irishman went to short and it was Bell's turn to bat. He hit the first pitch solidly into right field. The next man up was another left-handed hitter. He got a piece of the ball. A slow roller! A double play ball. Bell left first with the crack of the bat, O'Toole, covering second, leaped to take the high throw from Weston, as Bell tore down.

The ball crashed into O'Toole's temple and spikes glistened in the

4849 14½-24½

by Anne Adams

Half-sizes! Here's an air-cooled, fast pattern designed especially for fatigued, short-figured girls. It has a brief bolero to wrap on or off according to the whim of the weather. Proportioned to fit—no alteration problems!

Pattern 4849: Half Sizes 14½, 15½, 16½, 20½, 22½, 24½. Size 16½ dress 3½ yards 35-inch; bolero 1 yard.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in cash (money can be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept., Prairie Publishers Limited, 68 Front Street W., Toronto.

British editors have one way of rejecting contributions, and the Chinese have another. Here is one Chinese refusal, written a few years ago when there was still an emperor in China.

"We have read thy manuscript with infinite delight. Never before have we revelled in such a masterpiece. If it were printed the Emperor would ordain us to take it as a model, and henceforth never print anything inferior to it. As it would be impossible to find its equal within 10,000 years we are compelled, though taken with some reluctance, to turn the divine M.S. and for so doing we ask thee a thousand pardons."

—Progress.

The province of Nova Scotia originally was known as Acadia.

Funny and Otherwise

It was discovered, just at closing time, that a parcel of 20 £100 notes was missing at the bank. The staff worked all night trying to find them.

The manager called into the bank to begin her daily duties. She was asked: "Doreen, did you see a parcel of £100 notes?"

"Oh, that? Why, I just took them home to show mother the kind of work I'm doing!"

Two disgruntled farmers liked to grouse to each other.

"Never did see hay grow so short as mine this summer," sighed one.

"You think yours is short?" answered the other. "I had to lame mine to make it!"

Visitors—What are you looking for with all these experiments?

Professor—A universal solvent.

Visitor—What's that?

Professor—A liquid that will dissolve an' thing.

Visitor—That's wonderful. And when you find it, what are you going to do with it?

Mother—What do you mean?

Bobby—Well, you get \$50,000 for that longed-up of yours? I suppose it's all cash.

Bobby—Well, not exactly. I'm trading it for two \$25,000 kittens.

He—Do you love me, darling?

She—You know I do, Harry.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

Bobby—Yes, I will.

He—Harry? My name's Sam.

She—Of course! I kept thinking.

He—That's wonderful. And when you find it, what are you going to do with it?

Mother—Will you marry me?

OUR PRICES

on everything in the store, everyday of the week, are

LOW AS THE LAW PERMITS

Through our efforts to bring lower prices to the people, we have, on occasion, been checked by Inspectors that our prices are lower than the law allows. In the future our prices will be as low as the law allows to assist you in fighting the high cost of living.
